

RAHIMA SALMANOVA

Front-end Developer

Baku, Azerbaijan | hello.rahimasalman@gmail.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

Front-end developer with 5+ years of experience architecting and shipping production Vue.js/Nuxt.js platforms in TypeScript, with proven business impact (30-45% revenue uplift across two companies). Recent focus on integrating AI-driven features (Gemini, fal.ai, n8n automation) into client-facing products. Comfortable owning frontend architecture end-to-end and mentoring engineers through code review and pairing.

EXPERIENCE

New Media Azerbaijan December 2024 - Present

Front-end Developer Baku, Azerbaijan - onsite

- Co-architected and launched a TypeScript-driven Vue.js/Nuxt.js advertising platform, contributing to a 30% revenue uplift in the first quarter post-release.
- Engineered platform-wide file-upload, reporting, and payment modules via RESTful/WebSocket integration with Google Ads, delivering real-time data sync and a 16% improvement in page-level performance.
- Standardized reusable UI components, enforced performance budgets, and drove adoption of a unified design system - cutting load time by 6%, reducing UI inconsistencies by 10-20%, and boosting Lighthouse scores platform-wide.
- Conducted 300+ code reviews, wrote Cypress end-to-end tests for critical user flows, and led peer programming sessions, mentoring an intern who shipped 2+ production features within 3 months.
- Integrated n8n automation with Gemini, fal.ai, and ByteDance APIs to ship AI image/video generation features with WebSocket-driven progress tracking for ad campaigns.
- Used Claude Code to drive large-scale codebase refactoring, maintaining consistency and accelerating development velocity across the platform.

Adviad Inc. August 2022 - December 2024

Front-end Developer Baku, Azerbaijan - onsite

- Architected and led end-to-end development of a Vue.js application from concept to production, contributing to a 45% revenue increase post-launch at a startup that grew to \$10M in annual revenue.
- Engineered a cross-channel advertising platform (adviad.com) that streamlined digital ad workflows and improved user interactions across multiple channels.
- Optimized web application performance, achieving a 15% reduction in load time via Vue.js, Vuex, SCSS, and Google Maps API integration.
- Managed the full development lifecycle - version control, Docker environments, and cross-team collaboration via Jira and Slack - ensuring on-time delivery of project milestones.

Artifact Labs March 2022 - July 2022

Front-end Developer London, UK - remote

- Developed a suite of reusable Vue.js modules and a shared component library across GitLab repositories, shortening release cycles and unifying UI patterns across two international teams.
- Collaborated with QA to resolve critical bugs and established repeatable testing and peer-review workflows, boosting system stability and keeping post-release defects near zero.
- Launched a high-converting landing site for flagship digital-art products (GemBox, Materia, Aura.art) within 3 weeks of joining, accelerating pre-orders and early-access sign-ups with enhanced NFT transaction and artwork display flows.

VABISS LLC March 2021 - March 2022

Junior Front-end Developer Baku, Azerbaijan - hybrid

- Built responsive Vue.js pages (JavaScript, Vuex, SCSS) from Figma designs, achieving green Lighthouse scores for performance and accessibility across all major browsers.
- Created a library of lightweight, reusable Vue components, eliminating copy-pasted code, reducing maintenance overhead, and accelerating new-feature development.
- Streamlined team workflows by configuring dedicated Jira boards and task-coordination routines, improving tracking efficiency and ticket traceability.
- Promoted to Junior Front-end Developer after just three months of initial training, recognized as the fastest-growing member of the team.

EDUCATION

Baku Engineering University (Qafqaz University) June 2020 - September 2025

BSc in Chemical Engineering, Baku, Azerbaijan

- Fully-funded scholarship for Bachelor's Degree.
- Completed the 600-hour intensive academic English program and achieved level C1 (CEF).

TECHNICAL SKILLS

Frontend: Vue.js, Nuxt.js, TypeScript, JavaScript (ES6+), React, Next.js
State & Data: Vuex, Pinia, REST, Redux, Zustand, TanStack Query, GraphQL
Testing: Cypress, Jest
AI & Automation: n8n, Gemini API, fal.ai, ByteDance API, Claude Code, ChatGPT
Design/UI: HTML5, CSS3, SASS, Tailwind CSS, Bootstrap
Workflow: Git (GitHub/GitLab/BitBucket), Docker, Jira, ClickUp, Agile Methodologies

LANGUAGES

Azerbaijani (native) | English (advanced, C1)
